transcosmos joins the Taskforce on Nature-related Financial Disclosures (TNFD) Forum

Drive business activities respecting natural resources and biodiversity to create a sustainable society

transcosmos inc. (Representative Director, Co-presidents: Masaaki Muta, Takeshi Kamiya) hereby announces that the company has endorsed the philosophy of the Taskforce on Nature-related Financial Disclosures (TNFD) and has become a member of the TNFD Forum. The TNFD Forum is a group of stakeholders who support the vision and mission of the TNFD that aims to develop a risk management and disclosure framework for organizations to report and act on evolving nature-related risks and opportunities.

With the transcosmos SDGs Committee chaired by the Representative Director & Chairman in place, transcosmos has a framework specifically designed to execute its initiatives towards meeting social challenges and expectations with a focus on environmental, social and governance (ESG) criteria.

In addition, with the aim of driving its ESG initiatives to create a sustainable society and enhance its long-term corporate value, transcosmos has set out a fundamental sustainability policy. Under the fundamental sustainability policy, transcosmos is carrying out activities to become a Sustainable Transformation (SX) Partner for all with the purpose of boosting the well-being of society as a whole.

In June 2022, transcosmos declared its support for the Task Force on Climate-related Financial Disclosures (TCFD) and its recommendations to address climate change. Accordingly, the company disclosed its climate-related financial information aligned with the recommendations of the TCFD in March 2023. Recognizing the importance of natural capital and biodiversity in creating a sustainable society, transcosmos has now joined the TNFD Forum to drive business activities respecting natural capital and biodiversity. Going forward, transcosmos will identify and discuss nature-related risks and opportunities. At the same time, transcosmos will drive initiatives to contribute to solving natural capital-related challenges.
