transcosmos inc.

## **transcosmos joins Mitsubishi Electric's e-F@ctory Alliance and offers DX services in FA area**

### **Co-creates solutions towards digital manufacturing**

transcosmos hereby announces that the company has joined eF@ctory Alliance organized by Mitsubishi Electric Corporation (Mitsubishi Electric), a company which delivers e-F@ctory, an integrated solution using FA (\*1) and IT technologies. e-F@ctory Alliance is Mitsubishi Electric's partner program which aims to achieve 'one step ahead' monozukuri, or manufacturing, in collaboration with diverse partners by utilizing e-F@ctory. transcosmos has joined the program as an SI Partner (\*2), and will provide DX (digital transformation) in Production Process services that solve challenges and optimize production processes with the power of data.

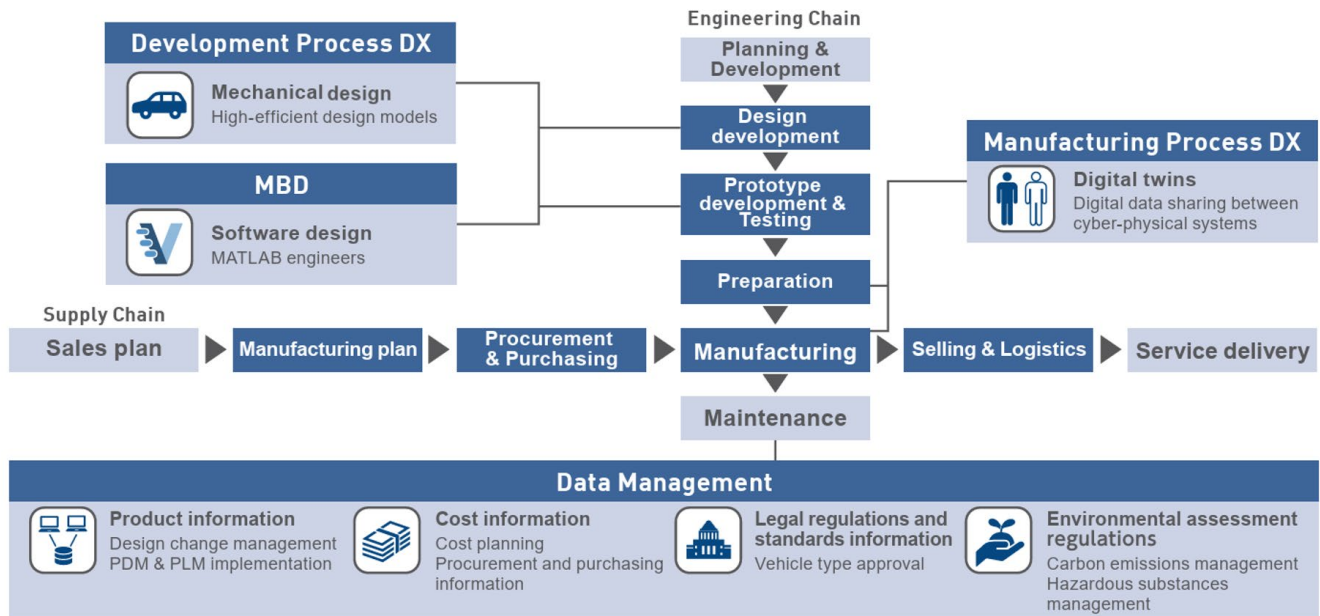

Despite digitalization in factory floors and production sites progressing in recent years, information inconsistency remains a challenge as data format and data handling processes differ by facility. Mitsubishi Electric's FA and IT integrated solution, e-F@ctory, solves such challenges in production sites to optimize factory floors. transcosmos has been providing services specifically designed for the manufacturing industry for more than 40 years. To bring about DX and streamline production processes, transcosmos will make the most of its proven expertise and utilize information related to production processes in various ways such as digitizing manufacturing-related information, preparing facility data for simulations, helping streamline production processes, creating a 3D model for digital twins, and more.

Being an e-F@ctory Alliance partner, transcosmos will collaborate with Mitsubishi Electric and other alliance partners to deliver high value-added solutions to clients, and ultimately help them boost productivity at production sites.

#### **DX in Production Process service**

- Tailored to each client's stage of digitalization, help drive their DX initiatives
- Help clients digitize manufacturing-related information, prepare facility data for simulations, and streamline production processes

- Create a 3D model for digital twins

With the aim of helping clients achieve sustainable growth, transcosmos will deliver DX services designed for the manufacturing industry, including DX in Production Process as part of its engineering transformation service offerings all for the manufacturing industry.

\*1 FA: Factory Automation. It refers to a process for automating the production process of a factory and other manufacturing environments.

\*2 SI Partner: System Integration Partner. Partners who produce entire production systems and aim to achieve advanced systems integration.

\*transcosmos is a trademark or registered trademark of transcosmos inc. in Japan and other countries.
