#### 2. Reason for the difference

The consolidated financial results for the fiscal year ended March 2016 showed a 12.8% increase in net sales compared to the previous fiscal year due to the expanded demand in BPO (Business Process Outsourcing) in the business segment of single-body service and overseas affiliate business. Regarding profit, due to expansion in sales in BPO service and cost optimization promotion effects, the operating income increased by 6.1% compared to the previous fiscal year, and the ordinary income decreased by 7.6% due to the effect by the loss from the foreign exchange rate difference. In addition, due in part to calculation of profit in the investment securities sales, the profit attributable to the parent company's shareholders increased by 3.2% compared to the previous fiscal year.
