CX Services Customer Experience Services

Accelerating marketing innovation

transcosmos Customer Experience services blend the "Real" and the "Digital" world together and deliver various multi-dimensional customer communication services to clients. Our CX services accelerate clients' marketing innovation.

Smartphone – a channel for everyone - connects and expands customer touch points

Customer touch points continue to expand, from ads, to websites, to calls, chats and chat bots. CX services support every possible customer communication channel and seamlessly.

Integrated Marketing

Maximize your fan base by executing marketing strategies that are based on "5A's" research methodology whilst communicating with them via all available channels

Channel-integrated Communication Services

transcosmos offers innovative loyalty marketing services with the exclusive rights to use "5A's" research methodology in Japan. With the aim of helping clients communicate with their customers throughout the customer journey from awareness, to action, to advocacy phase, transcosmos provides "Digital Marketing," "E-Commerce," and "Customer Care" all at one stop.

Develop marketing strategy with "5A's" research methodology

- transcosmos has received the exclusive rights to use "5A's" research methodology in Japan. Philip Kotler proposed "5A's" in his "Marketing 4.0.," replacing the traditional AIDMA model.
- transcosmos has formed an alliance with MarkPlus Inc., a company founded by Hermawan Kartajaya, the co-author of "Marketing 4.0."
- Exclusively offer "5A's" research technology in Japan and develop highly accurate marketing strategies.

Strengthen communication

Build engagement between consumers and clients

- Solve users' challenges and boost their interests in clients' services by offering more valuable information on services that ads cannot deliver, via the right communication channel at the right time
- Boost customer engagement by collecting and analyzing voice of consumers to optimize targeting accuracy as well as ad content

Create a new value of ads

Improve return on ad media

- Further improve return on ad budget by maximizing the ads' value through leading ad visitors to chat
- Improve the efficiency of ad delivery by categorizing users' chat responses in order to re-approach only the right users based on their category

Comprehensively structured all required features for loyalty marketing

5A Loyalty Suite

- Seamlessly deliver comprehensive services to develop and execute marketing strategies based on 5A's. The services include consulting, tools to support execution, project management functions, marketing automation tool operations and data analysis.

Improve brand image

Boost consumer recall, affinity, and appetite for the brand

- Increase brand recall, affinity, and motivate the users to take action by responding to chats
- Evaluate the ads performance by comparing with regular banner ads, TV commercials, etc.

Connect data with our unique DMP

Leverage chat data

- transcosmos's DMP, "DECode" connects chat data with other various data to perform deep-dive customer analysis and reporting
- Deep-dive analysis on aggregated data offers new findings that help clients develop new marketing initiatives

Leverage AI, BI & DMP

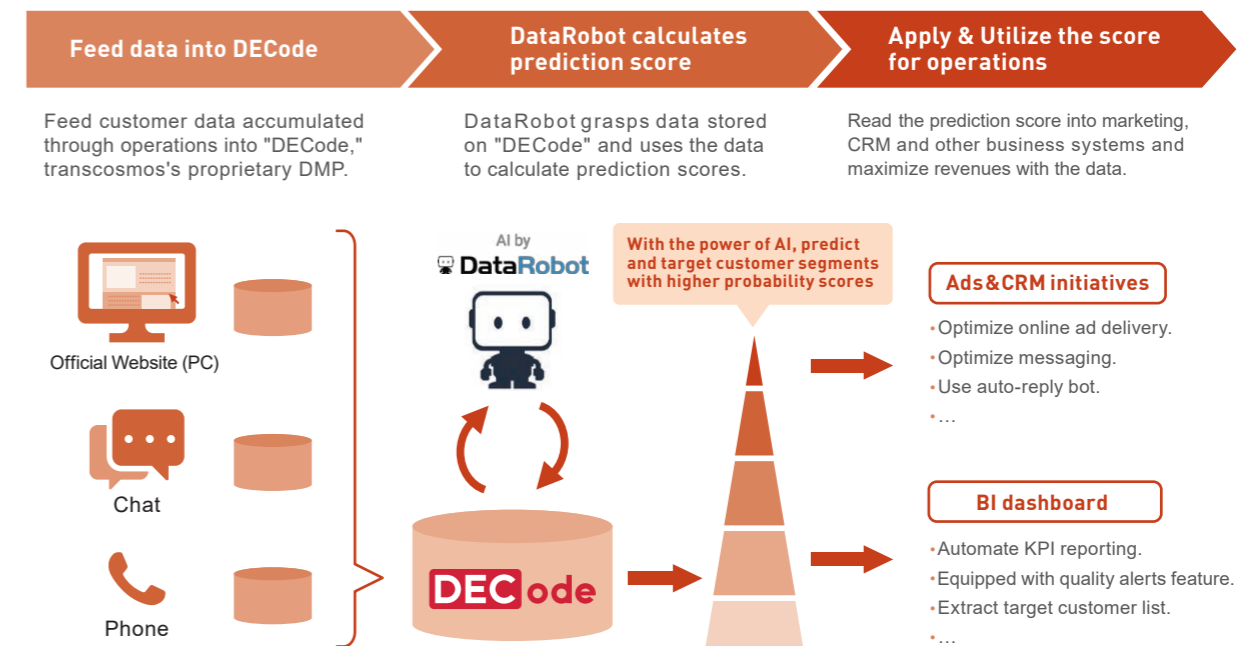

Offer "scheme" and "operations services" that enable AI powered, data-driven integrated communication

AI & Data-Driven Communication Services

By integrating data obtained from various channels and leveraging a "scheme" that connects with AI and BI tools, transcosmos offers "operations" services with the power of AI and data to lets clients deliver integrated communication. Operations services include optimizing targeted ads and messages, visualizing KPI management and more.

A "scheme" that integrates all data across multiple customer channels including marketing and customer support into DMP (Data Management Platform), and connects the data with AI, BI and other tools.

AI & Data-Driven Communication Services

Outsourcing services that offer know-how and service framework that enables clients to perform AI and data-driven "operations."

Optimize retargeting with the power of AI

Retargeting Advertising Services

- Apply machine learning to web access log analysis and predict customer segment with high conversion probability scores.
- Target and effectively deliver retargeting ads only to customer segments with high purchase probability scores.
- Automate the whole operations process from prediction to delivery.

Optimize segmented delivery with the power of AI

LINE Messaging Service, "WHITE BASE"

- Improve ROAS (Return On Advertising Spend) by delivering LINE messages by segment instead of sending them to all friends.
- WHITE BASE auto-generates a list that shows "individuals who are most likely to buy" and "the best timing to show your offer."
- Manage lists and KPIs with WHITE BASE's proprietary tools.

Internet Promotion

Support clients' marketing strategies by leveraging cutting-edge ads technology

Internet Promotion Services

With our cutting-edge solutions that leverage the latest ad technology and our 6 ads operational bases in Japan, transcocosmos offers global support for businesses' marketing activities that have become ever more complex, with a myriad of different devices and media in addition to evolving ads technology.

End-to-end support for social promotions ranging from planning to analysis

Social Ads

- With optimum promotional methods that make the most of social networks that include Facebook, Instagram, Twitter and LINE, transcocosmos solves challenges that clients' face. Our team of experts in social media and ad operations help clients succeed in their social promotions by using data obtained from analysis.
- Boost ad performance by using a variety of ad tools that include ad operations tools offered by "Sprinklr," an integrated social management platform, and "Fortuna," an ad delivery DMP by the certified LINE partner Supership.

Develop strategic planning and operations for search engine (SEM and SEO)

Search Engine Marketing

- SEM (listing ads) & SEO (Search Engine Optimization) specialists develop and execute strategies by making the most of cutting-edge ad technologies on major media such as Google, Yahoo!, and Amazon.

One-stop support for customer acquisition, data analysis and monetization via apps

Apps Marketing

- Propose the best solutions for challenges clients face such as increasing installs and expanding sales. transcocosmos helps clients maximize their profits by offering integrated apps marketing support that includes ad planning and operations, and user analysis with the use of DMP.

Perform quantitative and qualitative analysis on challenges that website, apps, and social face

Data Analysis

- By analyzing data, transcocosmos solves marketing-related challenges that businesses face. Our dedicated team that has expertise in Google Analytics and other analytic tools sets KPIs, supports implementation and develops analysis report. The team helps clients smoothly operate their marketing PDCA cycle.

Support clients' media strategy across devices

Display Ads

- Focusing on video ads, DSP and infeed ads, transcocosmos develops customer touchpoint-oriented media strategies across all devices. We optimize ad delivery and targeting by programmatic media buying, and boost ad performance.

Maximize ad performance with the power of cutting-edge technology

Data Feed Marketing

- Maximize ad performance by conducting personalized marketing for each individual customer based on customer and product data automatically. Primarily focusing on Google Shopping Ads and Facebook dynamic ads that work in sync with product and inventory information, the service helps clients solve the challenges they face.

Create and improve creative content logically

Creative Methods

- transcocosmos's experts with an extensive record in creating content for diverse industries develop creative content. By developing and verifying creative content based on statistics and psychology, our proprietary method helps clients improve their ad performances rapidly.

Develops appealing ads based on users' voices posted on SNS

Improves ad performance at high-speed with its proprietary reports

Calculates the right number of ads and implements high-speed PDCA cycle

Diagnoses and improves LP based on its unique assessment criteria

Ad creative method optimized for media characteristics

Ensures high-speed PDCA cycle using statistics

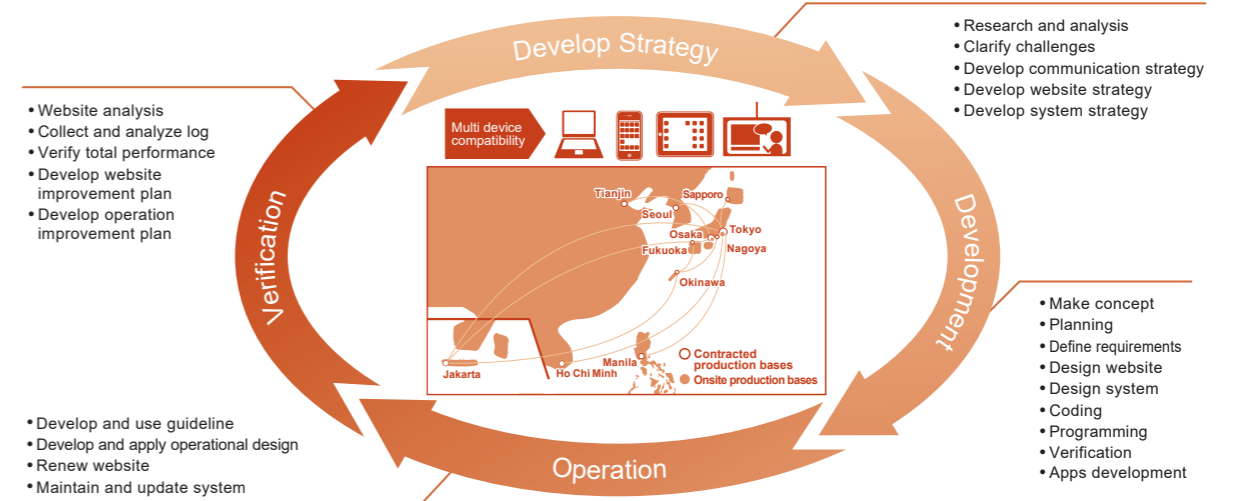

Website / Platform Development & Operations

Deliver the best channel and experience to clients through operating a PDCA cycle at one stop

- Report the results of analysis and encourage clients to utilize the findings and the PDCA model for future improvements

Make the most of omni-channel

Platforms that connect online and offline

Omni-channel integrated platforms

"Gotcha!mall" & "MOALA"

A platform that connects consumers with stores and products

Gotcha!mall

Gotcha!mall, a shopping-mall style platform matches up consumers with stores and products with the power of technology, invites consumers to stores via smartphones, and promotes them to shop and dine out.

Gotcha!mall.

3 distinctive features

1 Provides an easy-to-use touchpoint where non-regular customers keep coming back regularly.

Having a diverse store network provides non-regular customers with touchpoints.

2 Considering the needs and wishes of each individual consumer, Gotcha!mall motivates everyone to shop actively.

Artificial Intelligence analyzes each individual's various behavioral data and delivers incentives that best match each user's specific attributes and situation.

3 Gotcha!mall incentive-based pricing (pay-per-sale) is linked to store sales and profits.

No initial or fixed monthly payments. Stores & brands can execute effective and economical sales promotions continuously. What's more, they can control their total expense budget by setting the number of winning capsules.

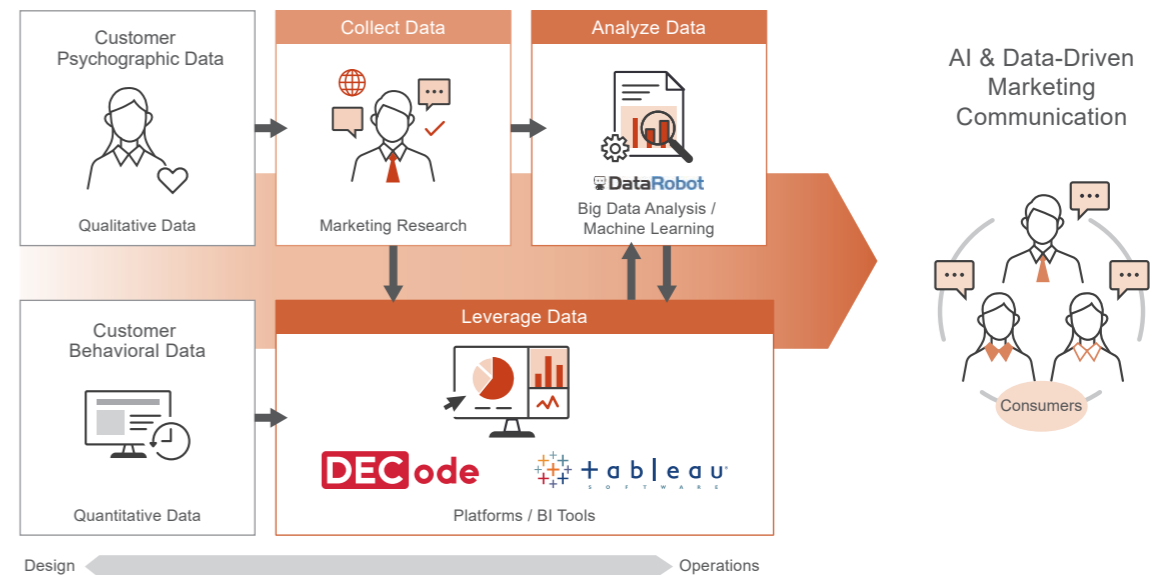

Research & Analytics

Expand revenue and improve customer experience by researching, analyzing and utilizing big data

Marketing Research and Analytics Services

On top of assisting clients in designing & conducting research and analysis, and implementing & utilizing AI and other tools, transcosmos builds a platform that collects, analyzes and utilizes customer psychographic and behavioral data. Ultimately, transcosmos helps clients perform AI & data-driven marketing and communication.

A web-based platform that integrates digital into a whole live experience

MOALA

MOALA is a connected stadium platform which is based on an implementation-ready e-ticketing service "Quick Ticket." By digitalizing all kind of services associated with a live experience, MOALA lets visitors enjoy the live event more than ever before.

MOALA Connected Stadium

3 implemented features

1 Quick Ticket

An e-ticketing service, no app required.

4 distinctive features

1. Easy to implement with existing ticketing system.
2. Easy to receive & prevent illegal resale.
3. Able to use together with paper-based tickets. Easy to welcome visitors at event sites.
4. Enables continuous communication with event visitors.

2 MOALA Market

An e-commerce feature specifically designed for real events. Users can buy live-related products and services including drink tickets, meet & greet plus handshake tickets and exclusive digital content.

3 MOALA Pocket

A logging feature that enables users to manage all live experiences that include entry tickets, special coupons and photos in one single space.

Marketing Research Services

- Identify areas for improvement in terms of customer convenience and satisfaction based on "information to be collected" through questionnaires and interviews.
- Utilize various research methods that include ad performance measurement, website UI improvement, CS and Intention to Recommend survey, global research and more.

"DataRobot," an automated machine learning platform

- An automated machine learning tool which is developed by the world's leading data scientists.
- DataRobot AI automatically builds the best predictive models and helps clients streamline analytics processes.
- Ensure easy and fast system deployment with its API connect and other useful features.

Big Data Analysis and Machine Learning

- Analyze customer behavior and comments based on "collected information" that include access and call logs.
- Help clients create customer segmentation and predict purchase probability by making the most of machine learning and text mining methodologies.

Platforms and BI Tools

- Assists clients to connect their systems to external systems that include ad delivery engine and automation tools.
- Offer "tableau," a BI tool and help clients develop & implement dashboard.

100% subsidiary specializes in research and analysis

- transcosmos analytics overview
- Over 60 consultants and data scientists collect and analyze various data. The company supports improving customer satisfaction and expanding sales, through combining its extensive know-how on data with the latest IT.

A diverse range of services from industry-specific operations to selling and logistics

Business Process Services

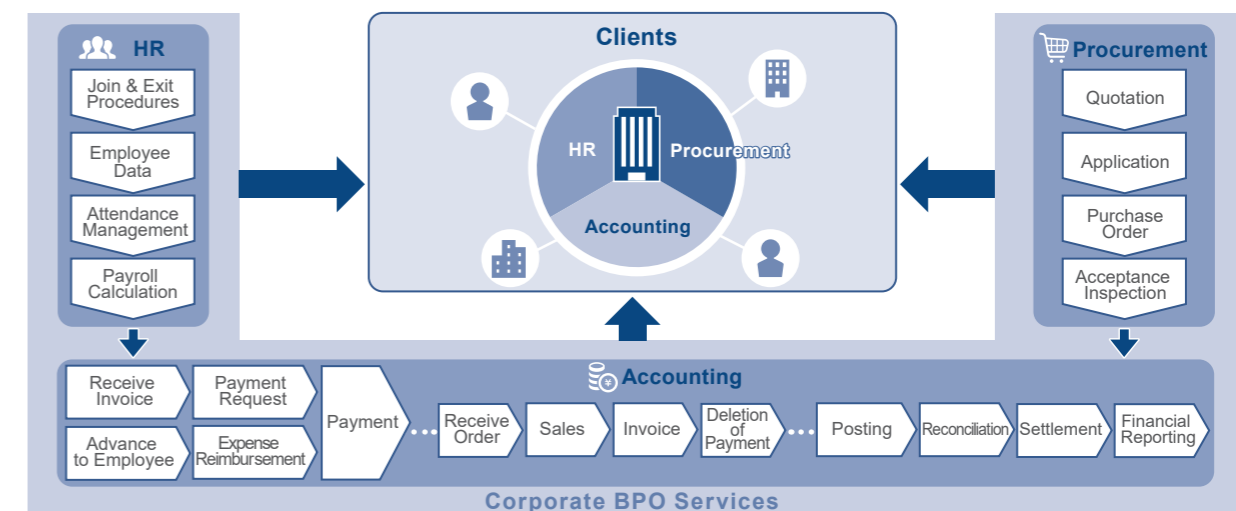

transcosmos helps clients shift their resources from indirect operations to direct operations through optimizing processes and costs of various indirect operations including those in critical functions.

Assist clients in transforming back-office function operation – the core of their competitive position - ultimately helping them boost competitive edge and revenues.

Corporate Back-Office Services

From HR, accounting, to procurement & purchasing, transcosmos offers end-to-end back-office operations services for corporate functions – the core of their business. Through BPR (business process re-engineering) and digital tools, transcosmos helps clients make highly employee-friendly business processes and achieve DX.

Business Smart Sourcing

From receiving paper-based and online application forms, screening to serving customer inquiries, transcosmos offers industry specific services for the finance and public sector via its proprietary service platforms. transcosmos builds an effective framework rapidly to help clients prevent opportunity loss and optimize costs while reducing their workload.

- Finance solutions
 - Build digital-powered processes to streamline industry-specific back-office operations and optimize operations for the financial industry where a shift to non-face-to-face transactions continues to accelerate. With its highly secure BPO centers, transcosmos offers one-stop services from receiving documents via various channels, designing optimal report formats, performing automated screening, to storing documents.
 - By centralizing all operations, transcosmos builds a stable operations framework, and ultimately helps clients prevent opportunity loss and optimize costs.
- Public sector solutions
 - The public sector must set up an operational framework swiftly and process an enormous amount of data to keep up with the changing social landscape. With its platform specifically designed for the public sector, transcosmos manages all information from application to payment on a single platform. Progress can be checked with its real-time monitoring, and operations stabilized even for a project that requires large-scale data processing.
 - Digital and BPO combined services help the public sector manage urgent projects as well as large-scale projects for developing social infrastructure.
- DX promotion services
 - Drive DX - from streamlining, centralizing and standardizing operations to achieving workstyle reform, and more.
- Operations services
 - Using its proprietary platform, transcosmos offers one-stop operations services from receiving applications and screening to serving customer inquiries.
 - Establish a stable operations framework by centralizing operations and using multiple BPO centers across Japan, thereby preventing lost opportunities and optimizing costs.

Sales Back-Office Services

Offer a range of services from back-office to customer services related to selling and sales activities. Help Sales teams focus on their core operations such as making proposals and carrying out sales activities.

- Selling, contracting, and billing support services
 - Comprehensive support services for time-consuming clerical handling and administrative tasks related to sales - from making estimates, contracting, to billing and collection.
 - Present a plan towards optimizing the entire digital-manual mixed process.
- Agency support services
 - Assist agencies in all kinds of administrative operations from handling product and service inquiries from dealerships, receiving repair orders to arranging repairmen.
 - Build and standardize industry-specific product knowledge using IT, and boost both quality and speed of service.

SCM Back-Office Services

End-to-end services for the Logistics department with a focus on order management process from purchasing, arrangement, to billing.

- Integrated order management services
 - Comprehensive services focusing on order management operations, from ordering and inventory management to billing and collection.
 - All services are powered by QOSIS, transcosmos proprietary order management platform.
- Trade back-office services
 - End-to-end services covering the entire trade process from import/export arrangements, customs broker arrangements, documentation, insurance contracts, post-departure support, to invoice payment.

Provide end-to-end back-office services for HR department

Accounting

- Provide comprehensive support services to assist clients' HR department. The services include managing employee data by reflecting new hire, resignation and other updates, managing monthly attendance management and calculating payrolls.
- Streamline operations by standardizing various processes and rules.
- Perform identity verification and data registration that are required to receive My Number (the Individual Number) in a secure environment.

Assist purchasing-related day-to-day processes including getting estimates, ordering and requesting acceptance inspection

Procurement and Purchasing

- Centralize purchasing operations to BPO centers, and optimize operating costs.
- Control business processes and practice green procurement (procurement of products and services that have a reduced effect on the environment) and CSR procurement to reinforce compliance with related laws, regulations and social norms.
- Reduce the purchasing team's workload and make the team focus on more strategic operations that require specialized expertise.

Comprehensive back-office services for HR department

Human Resources (HR)

- Shift from in-house to BPO. transcosmos BPO services can take over 70 to 80% of HR and labor management operations
- Services available for annual operations such as inhabitant taxes update and year-end tax adjustments.
- Certified labor and social security attorneys at transcosmos Social Insurance and Labor Advisors Corporation offer social and labor insurance services.

BIM Services, Construction Support, and Housing & Housing Equipment Design

Deliver one-stop support services for the entire process from planning, designing to maintenance

Urban Solution Services

Infrastructure (Civil engineering)			
Facility (Facility, building materials, telecommunications, electricity)	Services for the Building Equipment Industry 3D perspective drawings & MEP modeling Cost estimates Product modeling, parts, and parts modeling Outdoor electrical wiring design / construction permits application		

Offer platform which supports high performance-homes

Services for Housing Industry

- Comprehensive services all the way from basic design, detailed design and production design through to construction and renovation.
- Calculation services required for design work including structural and energy-saving calculations.
- System infrastructure developing services including business system development, component database development and CAD data management.
- Help construction sites utilize digital data and digitalize construction drawings such as temporary works design.

Going beyond BIM modeling to BIM-based construction management field

BIM Services

- Offer extensive services to maximize the power of BIM. The services include deciding scope of BIM usage, defining processes and operations.
- Comprehensive support from leveraging platform, to designing, to construction and facility management.
- Provide support services for BIM implementation, training and operations. The services include tool training sessions and software support desk.
- Create BIM objects for manufacturers of building products.

Support extensive processes in the building equipment industry

Services for Building Equipment Industry

- Via its centers, transcosmos offers an end-to-end service from developing product proposals and estimates to managing various inquiries from dealerships.
- Comprehensive support ranging from basic design, detailed design to production design
- Services include converting product design to 3D production data, and adding attributes.
- Comprehensive services from designing FTTH, wireless networks, electricity and pipeline facilities, submitting applications for various permissions, to handling construction back-office operations including construction project management, inspection and acceptance inspection.

Offer an extensive range of digital-powered construction services

Construction DX Services

- Help clients digitalize and utilize AR for execution planning and pre-construction inspection processes.
- Assist clients in making various tablet solutions regular tools at construction sites, and maximize the value of digital.
- Digital construction management services using BIM, CIM and videos.
- Help clients use electronic delivery for maintaining and managing construction data.

Machine Designing, Built-In Development, Manufacturing Plant, and Back-Office

End-to-end support services for the entire manufacturing value chain

Engineering Transformation Services

To deliver DX in the manufacturing industry, transcosmos develops a data analytics platform, digitizes information and digitalizes processes, and ultimately optimizes operations.

Create an information infrastructure towards achieving DX in business

Data Management Services

- Analogue-digital conversion
Convert to digital and visualize analogue information.
- Data cleansing
Convert incorrectly formatted data to usable data.
- Build a database
Centralize data in one place. Create an environment to store and use data.
- Monitor progress
Visualize and share progress in real-time.
- Data analytics
Analyze data, and feed back the correlation between predicted and actual values.
- Prediction
Perform performance and failure prediction based on the results of big data analysis.

Control all development-related information, and take over the entire design work process

Design Process DX Services

- Transform the entire design process from standardizing requirements specification, creating detailed design, creating various design data, to automating pre-release drawing review process.
- Offer a contracted design service per model for creating model derivatives and variations.
- Create a custom requirements template and automate the model generation process.

Transform the production process with digital twin

Production Process DX Services

- Help clients accelerate DX based on the phase of their DX journey.
- Comprehensive services from digitizing manufacturing information, creating facilities data for simulations, to streamlining production processes.
- Create 3D models for digital twins.

Software development services offered by MATLAB engineers

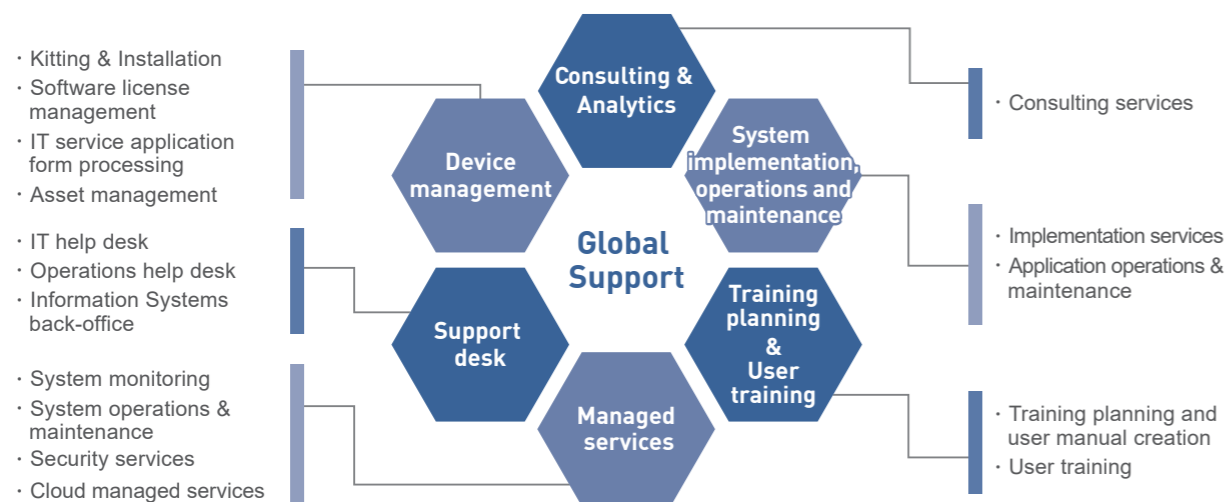

Built-In Development (MBD) Services

- Support design development, operation check and functional testing and verification in built-in development business area
- Model-based development (MBD) services using MATLAB & Simulink.
- Guarantee quality requirements with an operational framework built on a software development process model designed for the automobile industry, and in compliance with functional safety standards.

Help achieve IT & business process re-engineering towards a swift structural reform

IT Outsourcing Services

Achieve transformation towards enhanced business value by driving continuous IT & business process re-engineering. transcosmos helps Japanese companies go global from both business process and IT perspectives, and assists them in building a competitive edge in the global market.

Offer services towards enhancing a total experience (TX) based on best practices

IT Smart Sourcing Services

- Reduce costs and boost customer satisfaction with transcosmos operations management platform.
- Boost productivity and save personnel costs with the power of digital tools and KCS^{*1}.
- Reduce inbound call volumes by promoting self-service options and directing to non-voice channels.
- Visualize progress and shorten workflow by converting business processes to an automated digital workflow with ServiceNow.

^{*1} KCS: Knowledge-Centered Service is a methodology for creating, maintaining and utilizing knowledge related to FAQs, support contents, incidents, etc.

Provide the optimum support desk services that fit clients' business

Support Desk Services

- Provide wide-ranging support services from implementation planning, user training for business operations systems and ERP (Enterprise Resource Planning) systems, to help desk services.
- Propose effective solutions based on our business expertise, fully understanding the context of the inquiries coming from agents and dealerships
- Provide the optimum support for each industry and business from the user's perspective
- Global services for Japanese companies expanding abroad.

Offer ever increasing devices effectively and securely

MDLM* Services

- One-stop services ranging from procurement, to kitting, to operations management for multiple devices including PC, tablet, smartphone, and more
- Manage assets, configuration information, and critical information to ensure security, along with device information
- Support time-consuming operations such as developing master image, verification after OS and application updates, etc.

*MDLM = Multi-Device Lifecycle Management

Building on business knowledge, deliver IT x BPO services based on a BPaaS^{*2} model

Business Smart Sourcing Services

- Boost business competitiveness with hyperautomation.
- Streamline and optimize business operations with a system + operations packaged service.
- Help clients implement and roll out an ERP package, and stabilize operations. ERP packages include SAP, COMPANY, and Concur.

^{*2} BPaaS: Business Process as a Service, which combines SaaS technology with BPO.

Help clients protect their valuable assets from cyber attacks

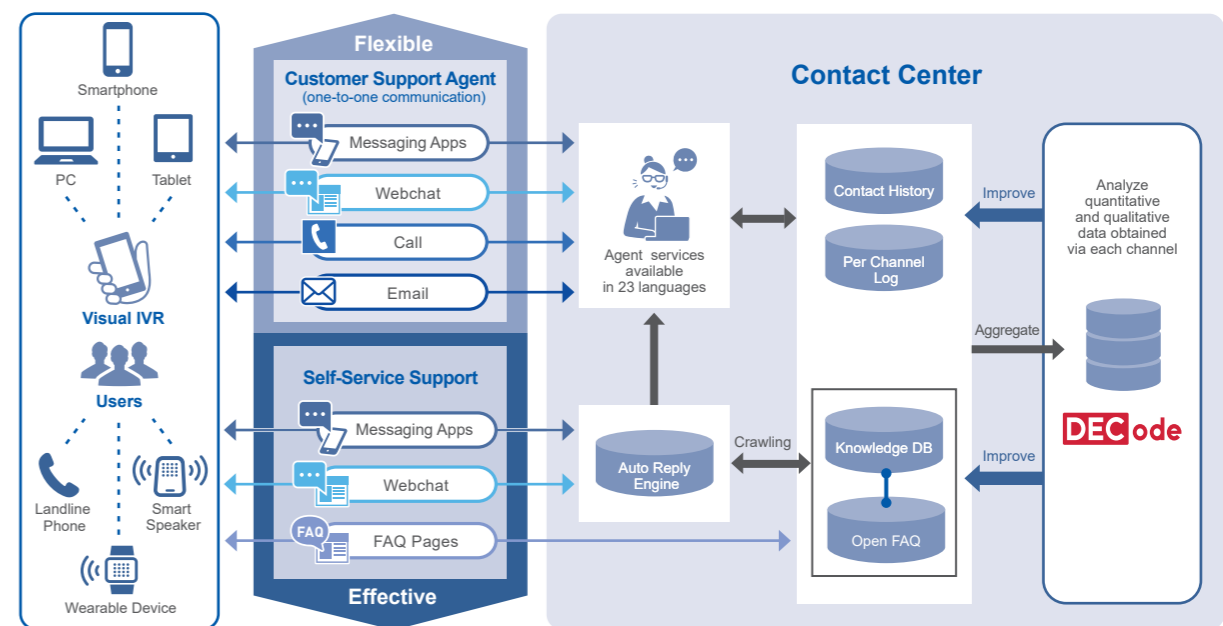

Managed Service

- Detect early signs of defects and failures by daily monitoring, guideline development and data analysis.
- Detect alerts at an early phase via real time monitoring, and solve issues immediately
- Prevent processing errors and improve operational efficiency by standardizing monitoring processes and implementing automation tools such as RPA.
- Provide 24/7 services by combining onsite (work at client's office) and our centers.

Deliver contact center services that optimize and maximize the value of customer experience

Contact Center Services

As customer behavior and mindset continue to diversify, customer services at contact centers become ever more critical. transcosmos helps clients build and operate strategic contact centers that support dialogue with their customers via various communication channels.

Support diversified channels

Digital Communication Services

- Offer non-voice services for smartphone users on top of traditional contact center services to support diverse, essential channels
- Chat operators and chat-bots offer non-voice services
- Help clients increase sales and boost customer satisfaction

Support designing contact centers that meet the business objectives

Contact Center Consulting Services

- Visualize contact center's missions and identify challenges
- Rebuild and create ideal contact centers by developing improvement plans
- Develop and apply quality management criteria and the cycle

Support implementation and operation of communication channels

Platform Services

- A cloud-based service centrally manages customer inquiries received via every possible channel. The platform has an ability to work with cutting-edge technologies that include voice recognition, bot and AI.

Provide services in Greater China (Mainland/Taiwan), South Korea, ASEAN, Europe and the U.S.

Global Contact Center Services

- Provide high quality contact center services across the globe by utilizing our accumulated know-how
- Support 30 languages with 81 bases and 41,000 workstations in Japan and abroad
- Provide multi-language contact center services for increasing foreign visitors to Japan by leveraging bases in Japan and abroad

Next-gen contact center solutions

Customer support services via LINE

- Provide call-chat hybrid customer support services via "LINE."

Speech Recognition Solution, "transpeech"

- Help call centers improve service quality and streamline operations by offering one-stop services that include implementation of a speech-recognition environment and service operations.

Cloud Contact Center Services Powered by Amazon Connect

- By merging its operational know-how into the basic functions of Amazon Connect, transcosmos delivers a contact center with cloud-based, flexible system architecture and consulting services.

Offshore

Ensure service quality equivalent to that of Japan at an affordable price

Offshore Services

transcosmos's offshore resources provide high-quality, affordable services in Japanese for clients in Japan.

Support non-core, back-office tasks

Back-Office Services

- Provide one-stop support for back-office tasks in accounting, human resources and administration departments
- Enable sales department to focus on their core tasks by providing support for creating sales report, managing customer and product information, making various application forms, making arrangements, managing contracts, creating quotation and processing expenses
- Reduce cost and improve productivity by leveraging our offshore bases

Process mass data at low cost

Document Solution Services

- Digitalize and encrypt reports and personal information documents by cooperating with data centers in Japan that are compliant with security guidelines recommended by FISC (The Center for Financial Industry Information Systems)
- Decrypt the encrypted data and perform data entry in offshore bases with the operational framework which matches with the task volume
- Recompose the reports and documents into divided digital data to prevent identifying the original personal information during the data entry process

Build framework for global website operation

Website Operation Services

- Build cost efficient framework while securing quality by cooperating with Japan domestic bases for multi-language translation, website development and verification
- The services include building 24/7 operational framework
- Offer English support desk services

Support multi-channel in Japanese

Customer Support Services

- Vietnamese, Chinese and Japanese operators provide support in Japanese via multi-channel including call, e-mail and chat
- Optimize cost by leveraging Japan domestic and offshore bases

Deliver quality development services equivalent to or surpassing that of Japan

Application Development Services

- Develop diverse services with a focus on CMS.
- Conduct end-to-end project management from design, development to system testing. Our dedicated quality management team offers high-quality service which meets Japanese quality standards
- Sign laboratory contract with us and we provide overseas production and maintenance bases for our clients. Our dedicated engineers that are well-versed in Japanese development process provide services in the dedicated development environment which is built on organized infrastructure
- Develop high-value systems, flexibly accommodating the clients' needs, using hybrid solutions that mix agile with traditional waterfall method

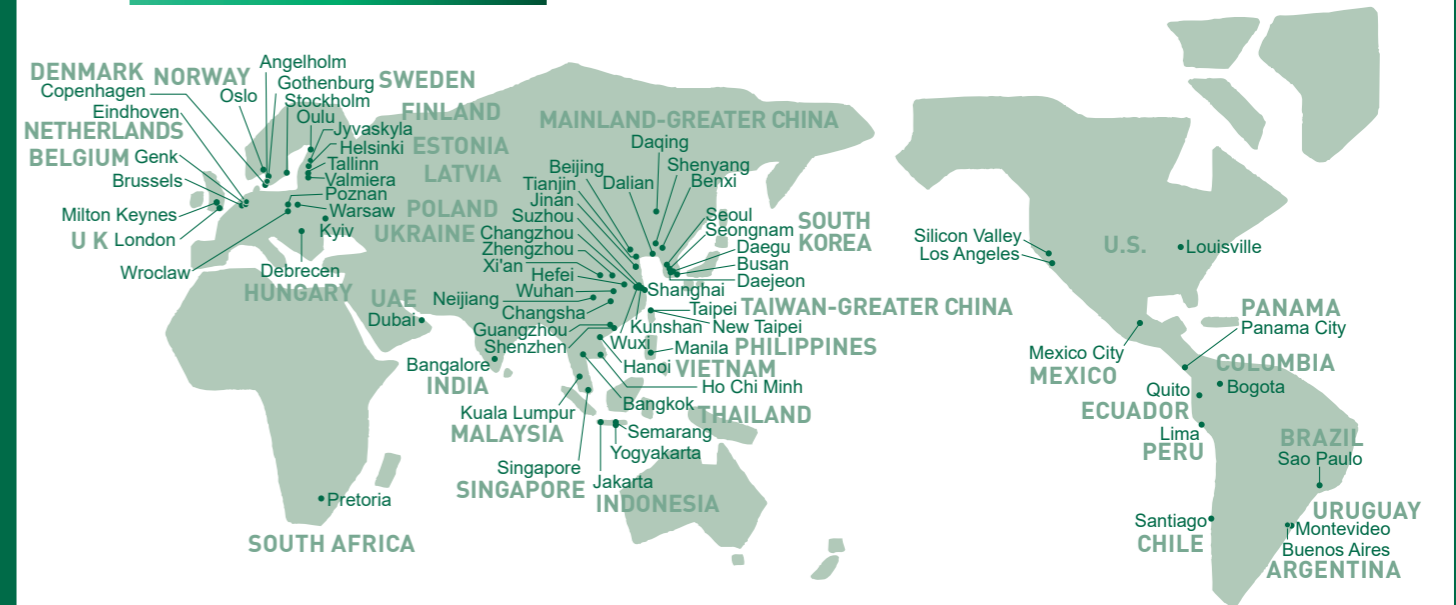

Realize cost reduction while securing high quality design tasks

Design and Development Support Services

- Provide wide-ranging supports for construction industry, including consulting for design and development, sales promotion, design and development, production and construction
- Realize both quality and cost reduction by performing mass design tasks in offshore bases under transcosmos's management

transcosmos supports clients' Global Expansion with our various outsourcing services

Management Philosophy and Corporate Vision

Client satisfaction is the true value of our company, and the growth of each of our employees creates the value that shapes our future.

people & technology | Origin of our Business

transcosmos's original goal has been to deliver highly valuable services by uniting people with technology through "scheme." "People" refers to highly-skilled professionals who can offer considerate services that meet and exceed client expectations, whilst "technology" means the world's cutting-edge technologies that enable us to deliver value to our clients. transcosmos will continue to raise the bar of the Origin of our Business which is to create business processes that best match each client's needs by combining "people & technology."

Operational Excellence | Service Philosophy

Embracing global market diversity, transcosmos always selects "people & technology" which best suits each local market with the aim of building and offering our excellent business operations to each client. For transcosmos, Operational Excellence is where our speedy, cost-effective and accurate operational capabilities ensure that clients have highly competitive business processes that ultimately become the source of their competitive strengths. Being a BPO provider who optimizes their business processes and drives their transformation, transcosmos advocates this Operational Excellence as our service philosophy.

Global Digital Transformation Partner | Corporate Message

As digital technology continues to evolve, consumer touchpoints with businesses have diversified and consumer influence on businesses has become more powerful than ever before. At the same time, industrial borders have become vague as new players, focusing on the cutting-edge technology, continue to emerge. Now, in order to adopt to the changing business environment and to support our clients' transformation, transcosmos provides two new suites of services, tapping into the digital technology.

First is the services that support improving customer experience by removing the barrier between marketing, sales and support to centralize diversified consumer touchpoints. Integrating our long-standing, proven know-how on consumer communication and digital technology with our global service network, transcosmos aims to become the one and only partner who can work with the clients to drive their initiatives to improve customer loyalty as well as to expand their sales and profits. Second is the services that support digitalization of clients' internal business processes to respond to digitalized market and consumers. Leveraging the digital technology-based automation and the digital platform, transcosmos develops a simple business process together with the clients and supports its operation. transcosmos continues to support clients' transformation by seamlessly connecting those two suites of services. As one transcosmos, we endeavor to become the trustful Global Digital Transformation Partner for all our clients.

Sales and Clients

Sales			Clients					
Consolidated Sales (in million yen)			Sales mix by sector		Sales mix by key clients			
Fiscal year	Yen amount	Growth rate	(2024 / 3)		(2024 / 3)
